

APPLIED MATHEMATICS AND COMPUTATION

VOLUME 87

YOON J. YON AND DO Y. KWAK

Two-Level Additive Schwarz Preconditioners for P_1 Nonconforming
Finite Elements for Nonsymmetric and Indefinite Problems 1

IOANNIS K. ARGYROS

A Mesh Independence Principle for Inexact Newton-Like Methods
and their Discretizations under Generalized Lipschitz Conditions 15

SHEN ZUHE, HUANG ZHEN YU, AND M. A. WOLFE

An Interval Maximum Entropy Method for a Discrete Minimax
Problem 49

MIMMO IANNELLI, MI-YOUNG KIM, AND EUN-JAE PARK

Splitting Methods for the Numerical Approximation of Some Models
of Age-Structured Population Dynamics and Epidemiology 69

K. RAJENDRAN

Simulation of Unsteady Turbulent Flows with the Effect of
Fluctuating External Velocity by Using Quasi-steady Models 95

YUN-BIN ZHAO

Exceptional Families and Finite-Dimensional Variational
Inequalities over Polyhedral Convex Sets 111

PORNCHAI SATRAVAHA AND SONGPING ZHU

An Application of the LTDRM to Transient Diffusion Problems with
Nonlinear Material Properties and Nonlinear Boundary Conditions ... 127

MUSTAFA BAYRAM

A Novel Method for Analyzing Enzyme Kinetic Systems 161

AIPING LIAO

Some Efficient Algorithms for Unconstrained Discrete-Time
Optimal Control Problems 175

ABDUL-MAJID WAZWAZ

A Study on a Boundary-Layer Equation Arising in an
Incompressible Fluid 199

(Continued)

MOHSEN RAZZAGHI, ABDOLLAH ARABSHAHI, AND SHIN-FENG D. LIN	
Analysis of Linear Distributed Parameter Systems via	
Double Fourier Series	205
ALBERTO CABADA AND JUAN J. NIETO	
Rapid Convergence of the Iterative Technique for First	
Order Initial Value Problems	217
TYAN YEH	
Trapezoidal Rule for Multiple Integrals over Hyperquadrilaterals	227
GUANG-DA HU AND GUANG-DI HU	
Stability of Neutral Delay-Differential Systems:	
Boundary Criteria	247
KRYSTIAN KUBICA	
The Effect of Amphiphilic Counterions on the Gel-Fluid	
Phase Transition of the Lipid Bilayer	261
LIKANG LI AND JINRU CHEN	
Preconditioning Isoparametric Finite Element Methods Taking	
into Account Numerical Integration	271
OLIVIER GOYON AND PASCAL POULLET	
Preconditioned Newton Methods using Incremental	
Unknowns Methods for the Resolution of a Steady-State	
Navier-Stokes-like Problem	289
1998 SUBJECT INDEX	313
VOLUME CONTENTS
